

IGP du Val de Loire « Sauvignon »

The world-renowned variety **Sauvignon Blanc** is now well-established at Domaine Martin, on a gently sloping terroir of gneiss. And it's not alone! We also grow **Sauvignon Gris** for a harmonious blend.

The planting density is 6,000 vines per hectare and the vines are carefully trellised to obtain controlled yields and fully mature grapes.

This Sauvignon has a crystal-clear lemon colour. It displays great **freshness of aroma**, with notes of white flowers and blackcurrant bud. The mineral-like elegance and supple texture on the palate give it unmistakable balance.

It's a multi-faceted Sauvignon that bursts with energy!
